

pipe support ancillaries

Radcoflex supplies a number of ancillary items that can be used with our Pipe Supports (also known as Spring Hangers) and the associated pipework.

These items include:

Sway strut assembly

figure 211

- to restrain the movement of piping in one direction whilst providing for thermal movement in other directions

Sway brace

figure 296 (non adjustable pre load)

figure 301 (adjustable pre load)

- for absorbing shock loading

Horizontal traveller

figure 170

- facilitates the supporting of piping systems subject to horizontal movements with limited headroom

Two bolt pipe clamp

figure 212 (standard)

figure 216 (heavy duty)

- for suspending hot or cold pipes where little or no pipe insulation is required

Three bolt pipe clamp

figure 295 (standard)

figure 295H (heavy duty)

- for suspending hot or cold insulated pipes where the load bolt must be outside the insulation

Hanger rods threaded both ends

figure 140 (right hand threads)

figure 253 (right and left hand threads)

Hanger rod with spade end

figure 148

Structural welding lug

figure 55

Welded beam attachment

figure 66

U-bolt

figure 137

Turnbuckle

figure 230 (standard)

figure 233 (heavy duty)

Eye rod

figure 278 (right hand thread)

figure 278L (left hand thread)

Fabricated eye nut

figure 290

Clevis pin with cotters

figure 291

Steel clevis

figure 299

Full technical specification booklets are available from Radcoflex to aid selection.
